2019-2020
Dillon County Technology Center
Career and Technology Education (CTE) Courses

High school students in Dillon School District Four have the opportunity to enroll in courses that are aligned with industry-recognized standards. Students that successfully complete approved *Career and Technology Education (CTE)* courses acquire credits toward receiving a South Carolina high school diploma. Students also acquire work-related knowledge and skills. CTE coursework establishes a connection to future goals which motivates students to work harder and enroll in more rigorous courses. Some of the approved CTE courses in Dillon County are offered at the high schools and at the Dillon County Technology Center. Counselors at Dillon High School, Lake View High School, and Latta High School meet with students annually to develop school schedules based on required courses for graduation and future career goals. The CTE courses noted below have been approved for the 2019-2020 school year. All of the courses are offered on the Dillon County Technology Center campus. Upon successful completion of courses, students may earn industry recognized credentials and/or dual credit hours from Northeastern Technical College (NETC). For more information on these options, contact Carolyn Crawford, at the Dillon County Technology Center. Parents/guardians or students interested in additional information about the CTE courses should contact their high school counselors, administrators or the Dillon County Technology Center.
